

Energy Poster

Purpose: Energy is very important in our world today. We need lots of it to power all our electronics, heat our homes, fuel for our cars, industry, and lots of other things. You will be exploring one type of renewable or non-renewable form of energy.

The energy source you will be exploring has been highlighted below for you!

Task Definition: Create small poster about your assigned type of energy. This will be displayed only, you will not be presenting it. Use the construction or copy paper provided.

<p>Renewable Energy Sources <i>(These sources of energy can be used over and over.)</i></p> <ul style="list-style-type: none"> • solar • wind • geothermal • biomass • hydropower (river or ocean) 	<p>Non-Renewable Energy Sources <i>(These energy sources have a limited amount. They will eventually run out!)</i></p> <ul style="list-style-type: none"> • coal • oil • natural gas • propane • nuclear
